

Polycom® KIRK® 2010 Handset

Small and Lightweight Handset for Basic Wireless Telephony

The Polycom® KIRK® 2010 Handset is designed for administrative working environments. The small and lightweight handset ensures that your employees really become mobile.

The KIRK 2010 Handset is designed for offices and administrative working environments. It is a small and lightweight handset for your basic wireless telephony needs. Furthermore, the handset is easy to use ensuring that everybody fast and easily can operate it. Thus, it is easy to implement in the daily workflow.

Business Benefits

The KIRK 2010 Handset meets the demands for mobility by holding the standard features employees in administrative working environments need in order to benefit from being wireless. By connecting a headset to the KIRK 2010 Handset your employees can even enjoy hands-free mobility.

With the KIRK 2010 Handset your employees can benefit from being able to move around the company freely while still being accessible. Thus, response time and the daily workflow are optimized as information can be delivered directly to the correct person where it is needed.

Benefits

-  Delivers exceptional voice quality without any background noise, echo, delay, or interruptions
-  Increases employee productivity as employees have immediate access to the information they need, and better can perform their tasks
-  Improved mobility and responsiveness as staff can be reached at all times anywhere within the premises
